EUROPEAN VAPERS PROTEST 2015

Parliament Square, Westminster **MAY 29th. 2.00pm.**
Show your support by attending!

Are you ready to fight the TPD?

Are you a smoker? You will only be able to carry on using cigarettes or try NRT no matter how smoking affects you in the future. You could end up with a heart attack, a stroke or breathing difficulties (you know the health risks!)

Are you a vaper? You will not be able to buy what you use now! 2ml tank capacity limit means most popular products will be unavailable. You will have less choice of e-liquids! Regulations around liquids and emissions testing mean that smaller e-liquid manufacturers will not be able to compete, or in many cases even stay in business. Larger manufacturers will be forced to restrict the choices in their liquid ranges. You will also have less choice of nicotine strength! The 20 mg/ml nicotine strength limit means that those most at risk from combustible cigarettes (heavy smokers) are least likely to be able to satisfy nicotine craving with e-cigarettes.

Cig-a-likes fit within the TPD. Do you want to be limited to one?

The TPD has already been passed. However, it is now up to the member state to decide how. Please log onto the link <http://article20legalchallenge.com/> and support the legal challenge (if you have not done this already).
